HALF MOON PIVOT AND SLIDE 2-SHELF SET - POLYMER TRAY

Minimum Inside Cabinet Depth

* Note: Minimum opening shown is for face frame cabinets.

- Standard bracket for face frame cabinet.
- Euro bracket for frameless cabinets, utilizing 90° blind corner base hinges. Euro bracket realigns the pivot point of trays to allow them to clear the door which (in this application) ends up inside the normal cabinet opening.

- **Contents:** Two shelf supports; two positioner bases; one bracket (6882-68-2), 17" center shaft, also includes template and instructions & two pair of slides.
- Tray system is based on minimum cabinet opening for the tray to pivot and pull-out. Therefore, when installing our tray system in a frameless cabinet with 90° BCB hinges, you must add 1-1/4" to our minimum opening dimensions. This will then provide a net minimum opening which will take into consideration for opening obstructions such as the door or the hinges.
